

DACON MECHANICAL WORKS BY ROPE ACCESS

FOR ALL YOUR INSPECTION NEEDS

Mechanical Works By Rope Access

Many small mechanical works are needed in difficult to access places that require scaffolding. As Dacon is also a leader in the field of Rope Access Inspections we have developed the capability to perform such mechanical works using Rope Access Technicians. By utilizing both of these techniques together we can save our customers time and money in both scaffolding costs and also by being a single source turn-key solution for these inspection related mechanical works.

Services

- Blasting
- Painting
- Insulation removal
- Flange tightening
- Valve replacement
- Pipe spool replacement
- Refurbishment work
- Bolt checking

Benefits

By using Dacon for small mechanical works you will benefit by:

- All in one solution
- Saved mobilization costs
- Saved scaffolding costs
- Less personnel on site
- Integrates with inspection services
- Less coordination amongst contractors
- More cost effective
