

DACON TRAINING INSTITUTE

FOR ALL YOUR INSPECTION NEEDS

WHO WE ARE

Headquartered in Asia our journey began 25 years ago in Norway from where we have grown to be Asia's leading Inspection Services Company.

With constant expansion our training needs outgrew the capacity of local providers which is when we launched our own Training Institute which was then opened up for commercial training by market demand.

Built on operational experience and technical expertise the Dacon Training Institute delivers the most up to date training courses in our world class facilities.

By utilizing highly qualified, dedicated and practically experienced inspectors we have a commitment to provide top quality levels of learning and instruction to meet the needs of our clients and the demanding industries in which they work.

API COURSES

Dacon Training Institute provides professional exam preparation for API courses aimed at engineers and technicians. The course's gives a solid foundation in API principles and provides the tools and knowledge needed to pass the API examination.

With API accreditation you can empower your personnel to ensure that API standards and codes are met in line with your customer's requirements.

The program benefits employers and the industry as a whole by helping to:

- Improve management control of process unit operation, repair, rerating, alteration and maintenance
- Reduce the potential for inspection delays
- Provide a continued high level of safety through the use of highly specialized and experienced inspectors
- Keep your equipment within the codes and standards set by API, ASME and other associations

ROPE ACCESS TRAINING

We maintain a world class IRATA Certified Rope Access Training Centre with full scale frames and structures, including a 10 meter tower, for real world practical experience.

Our Becoming IRATA certified in Rope Access allows your employees to work at height safely and conduct inspections and work scopes in difficult to access areas without the time consuming and costly process of erecting scaffolding.

After completion of our 5 day training course participants receive IRATA accreditation and we offer courses from Level 1 up to Level 3.

The courses are available in Thai or English language and are conducted by both local and International personnel.

NON-DESTRUCTIVE TESTING (NDT) COURSES

Dacon has been delivering conventional and advanced NDT inspection techniques for 25 years and is perfectly poised to deliver relevant NDT training courses that leverage from our skills and knowledge as well as the benefit of our real time experience.

With trained inspection technicians and personnel your organisation can ensure your systems are working safely at optimal output and that you can ensure effective maintenance planning and execution.

With our bright and modern training facilities and world class instructors we can deliver the following NDT Training courses:

- [UT Inspection Training \(All Levels\)](#)
- [PT Inspection Training](#)
- [MT Inspection Training](#)

COURSE DEVELOPMENT

With our world class facilities and experienced local and International training instructors we are able to provide tailor made courses specific to your needs for delivery either at our own offices or at your premises.

If your company has specific training requirements or its own inspection specifications then we can design courses and study materials and deliver the training program to bring your teams up to the standards that you require.
